

I oppose changes to the current broadcast system that would allow LPFM stations to overpower the signal sent by current FM stations. I listen to an FM station exclusively, K-LOVE, that could be seriously affected by LPFM. This station provides positive music and broadcasting that is safe for young ears and welcomed by mine. While the station is supported by a faith community it sends a message open to all. If nothing else, as I listen to this station as I drive all over the city, this positive influence keeps me from displaying road rage! The station provides a service to our community by broadcasting information (free of charge) regarding local happenings that are free to the public. In this time when one never knows what one will hear over the airwaves, either from an announcer's mouth or song lyrics, please do not snuff out a station that is safe for all in the community. Thank you.
